## cantiga de amigo

to listen while reading [amigo queredes vos ir?](#), by the king Afonso X, XIII/XIV centuries, Iberia, Paulina Ceremuzynska sings.

*this time there is no translation on the title. it doesn't exist. it is a Galician/Portuguese Middle Ages romantic song, where a woman speaks by a man's writing. Between one higher age to another, it seems that there is always a middle one. maybe's because of this that contemporaneity is seeking design foundation on the passed one.*

desta vez não há tradução possível para o título. e sabe muito bem.

Entre duas Idades Altas, parece haver sempre uma Média. talvez seja por isto que o desenho contemporâneo procura inspiração na mais recente.
