COLOURS THIS SEASON

COLOUR IS MOBILISING AND THE BOLD, SATURATED HUES THAT HAVE DOMINATED PALETTES FOR THE PAST FEW SEASONS ARE GIVING WAY TO MORE COMPLEX, TONED-DOWN SHADES. OUR EYES ARE READY FOR REST. THINK DUSTIER COLOURS, WITH EXCITING NEW UNDERTONES.

- zircon
- quench blue
- zany pink
- alexandrite
- lemon verbena
- grandiose

There's a new King of the colour charts: grey. The hues of this palette have begun to play a bigger role, calming down our interiors and becoming the new neutral. Grey of course is not standing alone; today's young, eco-minded consumers are enjoying life's luxuries but bringing their inner ethic voices with them. The new luxury palette reflects botanical hues (think deep red hibiscuses amidst a backdrop of soft turquoises and greens), and natural flower and root dyes to tint silks and cashmeres. Mineral (think mother of pearl and warm metallic shades) is looking great combined with earthy sensibility with refined taste. Greens have outgrown their rustic roots and ethical extravagance is the new status symbol.
