From a handcrafted rug comprised of dolls lying down in a bushy green 'field' to a modern Persian rug, your floor might end up being the most interesting part of your house with these mats from the 2010 Nodus rug collection.

" Our philosophy in the creation of this exclusive handmade collection could be summed up by quoting Francois-Henri Pinault: " Luxury is the meeting between a vision of the future which surprises and a comprehension of the past which reassures. This is how we have created and conceived this collection of unique pieces. The design will surprise and you will be delighted with the highest quality." - NODUS (yatzer)
